

Sustainable Investing and Personal Green Loans Seminar

The current changes in the planet's climate are transforming the world. The last two decades included 18 of the warmest years on record, and extreme weather events, such as forest fires, heatwaves and floods, are becoming more frequent both in Europe and elsewhere. The EU is fighting climate change through ambitious policies to meet its greenhouse gas emissions reduction target for 2020 and has put forward a plan to further cut emissions by at least 55% by 2030.

Malta too has pledged its commitment in reaching this target and a change in mindset is required for the country to do things in a more sustainable way. This change calls for a paradigm shift towards policy-making which centres around intelligent development principles.

The #ClimateOn – Turn On the Power for Change Campaign aims at changing the general public's habits towards a more innovative way of life. It aims at instilling thoughts for solutions and highlight the benefits of a low-carbon society while turning on action to find practical solutions to climate action. It highlights the fact that through simple but innovative ideas one can make a difference.

A webinar will be held on 4th June 2021 at 10a.m. to discuss Sustainable Finance, Sustainable Investing and Green Loans for personal customers. Want to know more? Do not miss this chance. If you are interested please register for the Sustainable Finance #ClimateOn seminar on the following link:
